

CHARTER

The Charter sets out the inter-related elements that define Opportunity Party's mission and how we will pursue it.

VISION

A statement of the world that Opportunity wants to see.

Opportunity's vision is for an Aotearoa New Zealand in which individuals, our society, and our environment thrive together.

PURPOSE

Opportunity's mission in pursuit of the vision.

Opportunity exists to enact policy that affords every Kiwi equal opportunity to pursue their potential, in ways that are socially, economically, and environmentally sustainable.

VALUES

To achieve its mission Opportunity must win widespread trust. That requires clarity and consistency about the non-negotiables the Party stands for.

FEARLESS HONESTY

Based on the value Truthfulness | Pono

Everyone deserves to know the unspun truth—it unlocks opportunity, even when it's uncomfortable or inconvenient. Fearless honesty requires courage and integrity.

NO TOO-HARD BASKET

Based on the value Ingenuity | Auahatanga

Fixing complex, systemic issues is hard, but it's why we're here. We don't shy away. Rather, we employ creativity and critical thinking, informed by evidence, to arrive at smart solutions.

EQUITABLE OPPORTUNITY

Based on the value Equality | Mana

Every individual is entitled to dignity, respect, and self determination regardless of background, situation, or beliefs. In the spirit of empathy, fairness, and kotahitanga we extend the same rights to, and expect the same responsibilities of, all.

WE ARE OUR RESULTS

Based on the value Efficacy | Whai Hua

We exist to drive actual change towards our vision, and our aspirations aren't achievable without a place at the decision-making table. The focus must be on effective action, not words.

PRINCIPLES

Opportunity will show it is living its values by ensuring all its mahi is underpinned by these fundamental priorities.

1. Follow evidence over ideology.
2. Prioritise long-term outcomes over short-lived wins.
3. Ensure economic efficiency is subject to both societal wellbeing and environmental sustainability.
4. Measure effectiveness by influence on policies enacted, rather than by the words we speak or actions we take.
